## About Hosted Email Security

Welcome to the *SonicWall Hosted Email Security 10.0 Getting Started Guide*. SonicWall Hosted Email Security is a cloud-based email security solution that offers protection against spam, phishing, and viruses. This document provides purchasing, activation, licensing, and basic set-up procedures for your SonicWall Hosted Email Security solution. For more information refer to this SonicWall Hosted Email Security FAQ article:

<https://www.sonicwall.com/en-us/support/knowledge-base/170504903060180>

For configuration information for your Hosted Email Security Junk Box, refer to the *Email Security User Guide*.

For detailed administration procedures, refer to the *SonicWall Hosted Email Security Administration Guide*.

Navigate to <https://www.sonicwall.com/en-us/products/secure-email> for the latest version of this guide as well as other SonicWall products and services documentation.

This guide uses the following conventions:

## Guide Conventions

Convention	Use
<b>Bold</b>	Highlights dialog box, window, and screen names. Also highlights buttons. Also used for file names and text or values you are being instructed to type into the interface.
<i>Italics</i>	Indicates the name of a technical manual. Also indicates emphasis on certain words in a sentence. Sometimes indicates the first instance of a significant term or concept.

# Pre-Configuration Tasks

The following tasks need to be completed before you can set up your SonicWall Hosted Email Security solution. SonicWall Hosted Email Security 10.0 is integrated with MySonicWall. Ensure that your SonicWall Hosted Email Security 10.0 product can communicate with it.

## What You Need to Begin

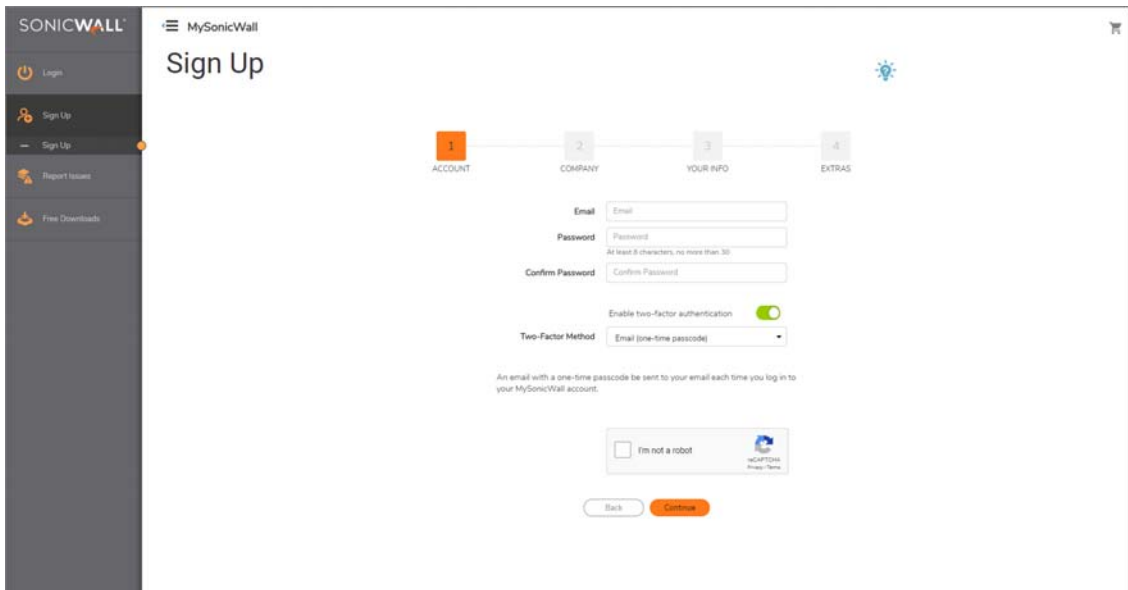

To configure a Hosted Email Security solution, you must have a computer that meets or exceeds the following requirements:

- An Internet connection
- A Web browser supporting Java Script and HTTP uploads.
- Supported browsers and operating systems include the following:

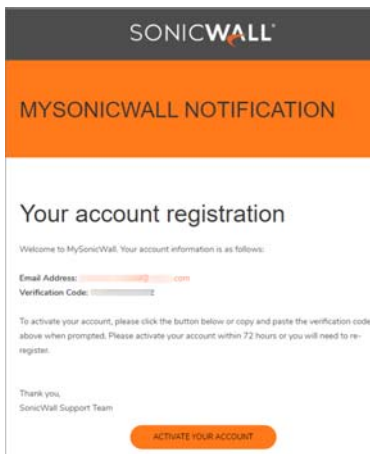

Windows 10 and higher	Mac OS 10.13 and higher
Chrome 67 and higher	Chrome 67 and higher
Firefox 60 and higher	Firefox 60 and higher
Edge 42 and higher	Edge 42 and higher
Safari 11 and higher	Safari 11 and higher

## Creating a MySonicWall Account

1. Navigate to <https://mysonicwall.com/login> and click **Sign Up** to create a **MySonicWall** account.
2. Complete the following fields to set up your account:
  - **Email address**
  - **Password**
  - **Confirm Password**
  - Toggle **Enable two-factor authentication**
    - Choose your **Two-Factor Method** authentication by selecting **Email (one-time passcode)** or **Microsoft /Google Authenticator App**.
  - Check the box next to **I'm not a robot**.

- 3 Click **Continue** and complete information required for **COMPANY**.
- 4 Click **Continue** and complete the information required for **YOUR INFO**. this includes information about how you want to receive renewal notices, whether you are interested in beta testing products, and what your preferred.
- 5 Click **Continue** to provide the additional information listed in **EXTRAS**:
  - Renewal contract information
  - Tax information
  - Distributor information
- 6 Click **Finish**.
- 7 Find the registration email message sent to you by MySonicWall.

- 8 Click **ACTIVATE YOUR ACCOUNT**.
- 9 Enter the **Verification Code** and click **Done**.

**Check your email**

An email has been sent to [redacted]@[redacted].com. Please check the verification link, or paste the verification code below.

If you did not receive a verification email, please contact [Customer Support](#).

Verification Code

[Resend the Code](#) [Done](#)

**NOTE:** If you selected **Email (one-time passcode)** as your method for two-factor authentication, an email with a one-time passcode is sent to your email each time you log in to your MySonicWall account.

- 10 Login with your MySonicWall credentials to get to MySonicWall.com.

# Purchasing SonicWall Hosted Email Security

There are several methods for purchasing the Hosted Email Security solution:

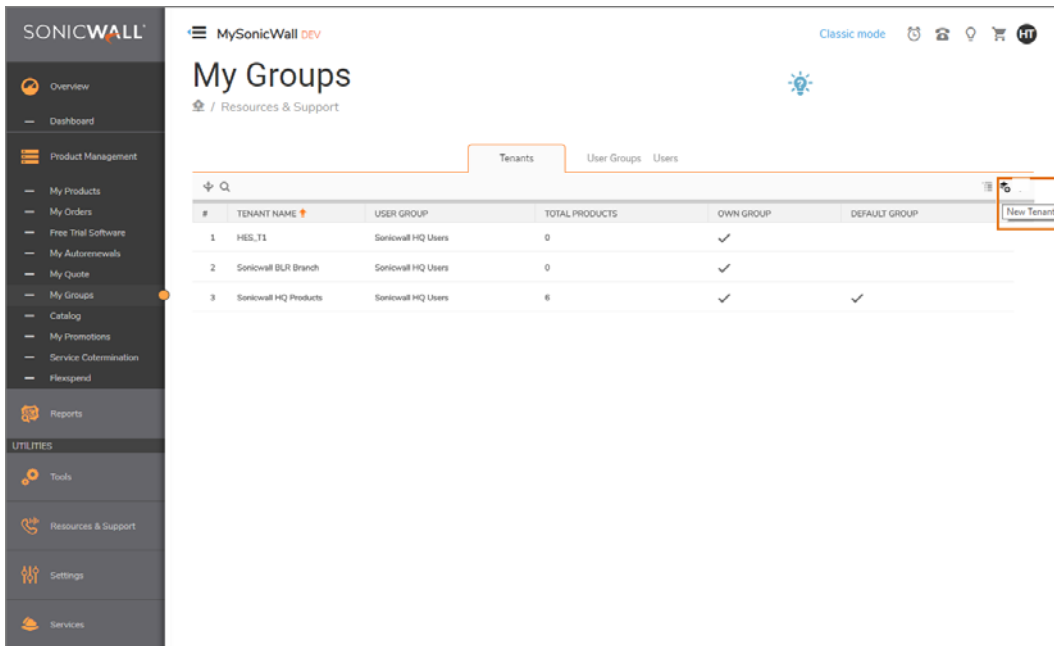

- Purchase from the SonicWall Managed Service Provider website:  
<https://www.sonicwall.com/en-us/resources/white-papers/managed-service-providers>
- Purchase from the MySonicWall.com site:  
<https://mysonicwall.com/login>
- Purchase from the Hosted MySonicWall.com site:  
<https://hosted.mysonicwall.com>

**NOTE:** You can purchase from <https://hosted.mysonicwall.com>, but users can now purchase the service directly from MySonicWall.com. The hosted Email Security page is redirected to the MySonicWall product catalog page.

- Find an authorized SonicWall reseller through the **Contact SonicWall Sales** website:  
<https://www.sonicwall.com/en-us/customers/contact-sales>

**To purchase the Hosted Email Security solution:**

- 1 Navigate to <https://mysonicwall.com> and login with your MySonicWall credentials.
- 2 On the left navigation panel, select **Product Management > My Groups**.

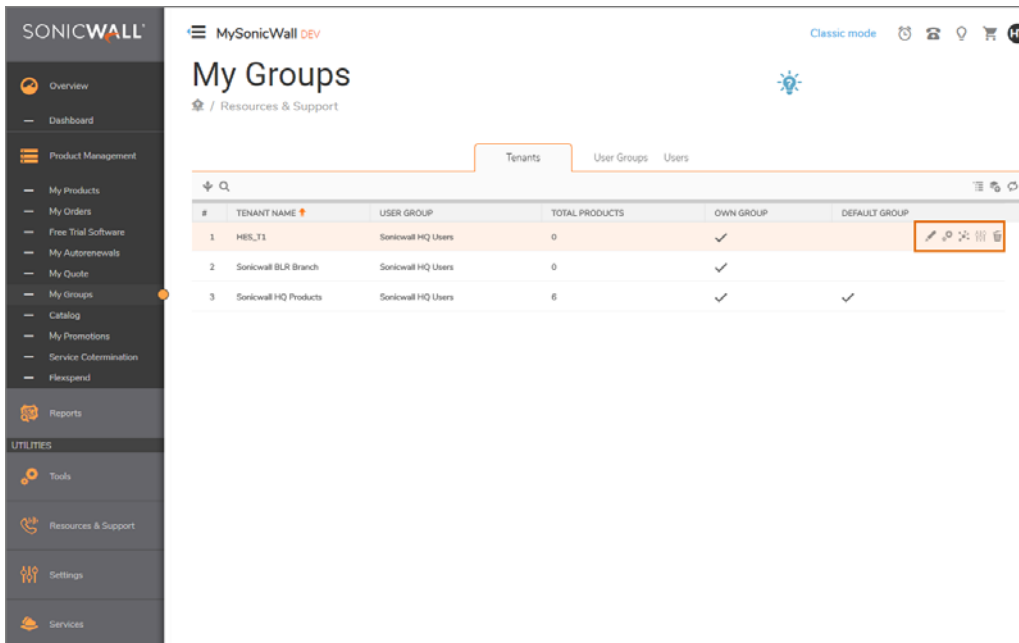

- 3 Click on the **New Tenant** icon at the top right of the table to create a tenant for your new Hosted Email Security product.
- 4 In the popup window, enter a descriptive **Tenant Name**.

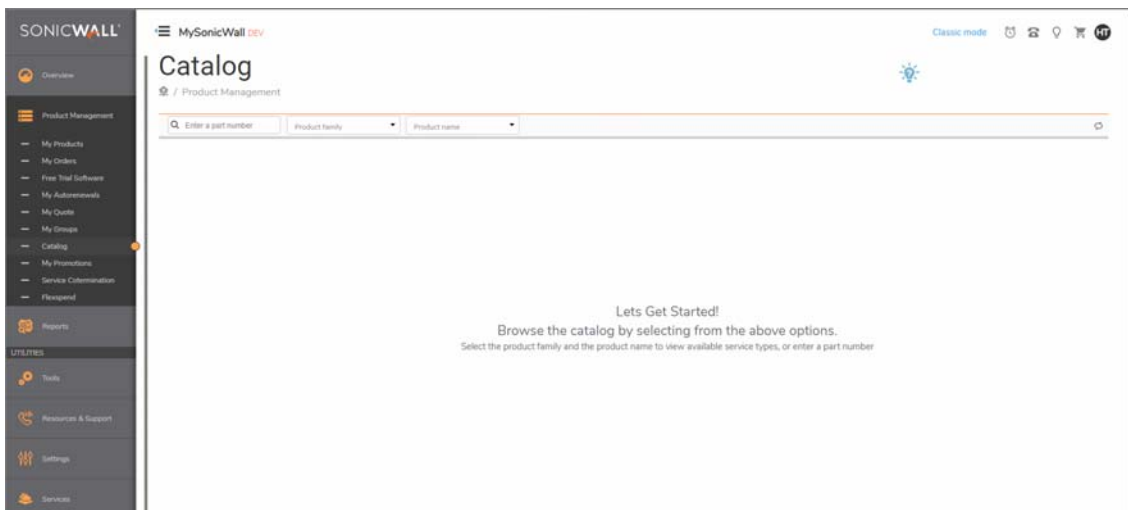

The 'CREATE NEW TENANT' popup window contains the following fields and buttons:

- Instruction: Enter a group name to create new tenant to share the products
- Tenant Name:
- UserGroup Name: - Buttons: Cancel, Confirm

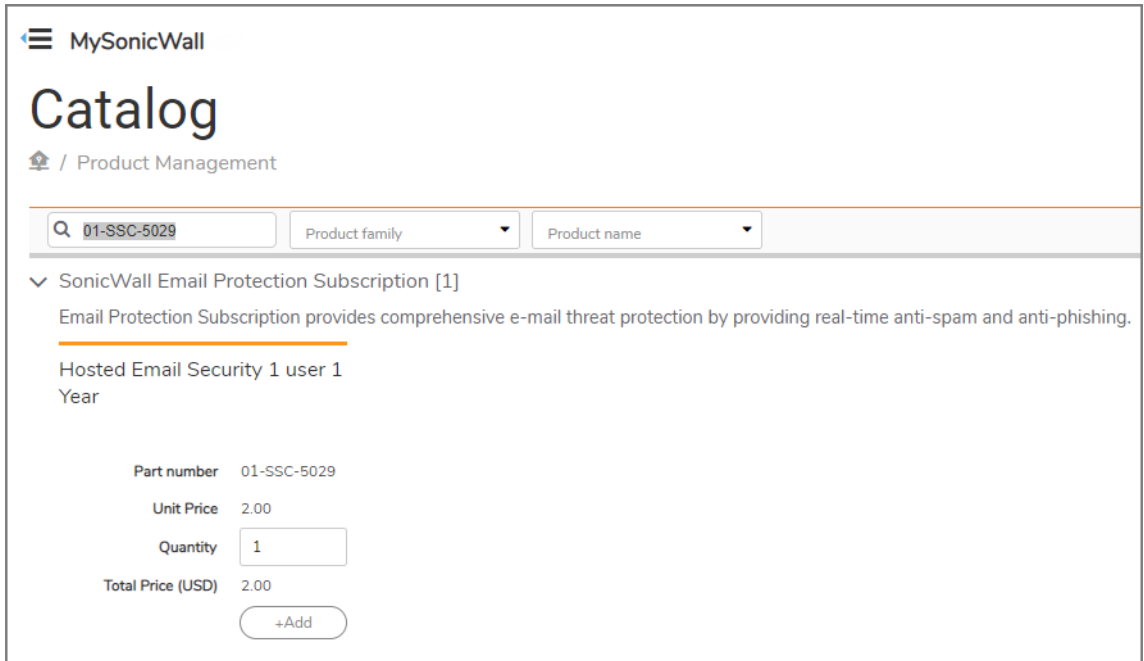

- 5 Select the **User Group Name** to manage the tenant and click **Confirm**.
- 6 Hover over the tenant name in the table and click on the icons to the right to edit, delete and perform other management actions for that tenant.

7 Navigate to **Product Management > Catalog** to purchase and active your Hosted Email Security.

8 If you have one, **Enter a part number** in the search text box on the left. For example, **01-SSC-5029** to buy the **Hosted Email Security protection subscription** for the amount of time and units you would like.

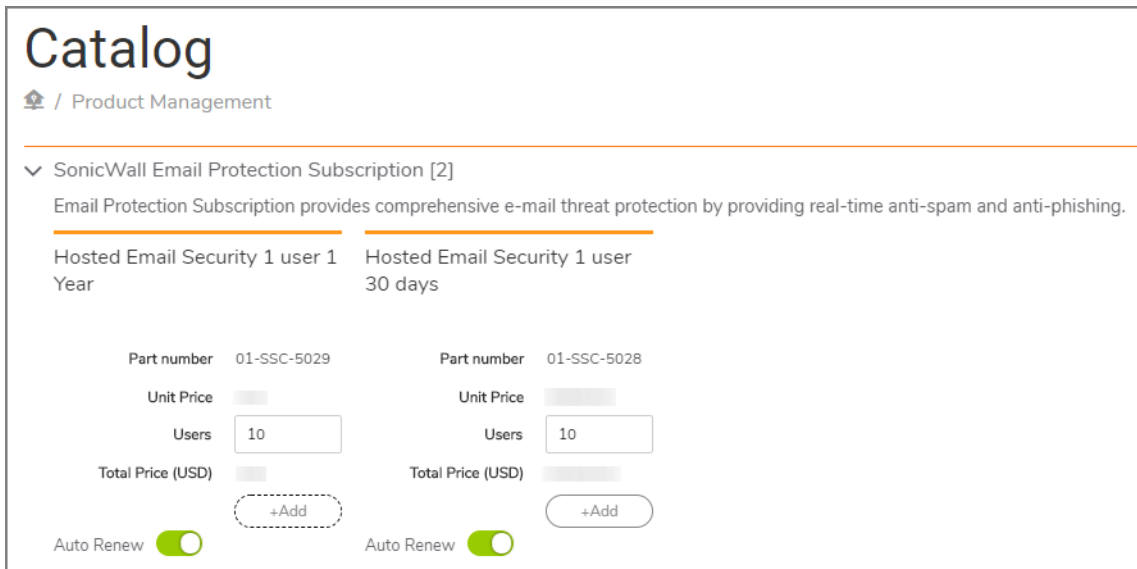

- 9 You can bypass entering a part number in the search text field, and choose the **Hosted Email Security** product from the drop-down list in the **Product family** text field.

- 10 Choose **Hosted Email Security** from the **Product name** drop-down list.

- 11 Expand the **Hosted Email Security** product offerings by clicking on the side drop-down arrow icon next to each item.

- 12 To calculate the cost of your Hosted Email Security solution, specify the amount of **Users** you want to purchase the service for and the length of time (for example: 30 days or 1 year). Enter a number next to **Quantity** and click **+Add**.
- 13 Choose a tenant from the **Tenant Name** drop-down list to associate your product with and click **Confirm**.

- NOTE:** After you click **+Add**, you can also create a new Tenant to park your product by clicking the **+Add New Tenant** button in the popup box.
- NOTE:** If you need help remembering your tenant name navigate to **Product Management > My Groups > Tenants** and browse the **TENANT NAME** column.

## Paying for SonicWall Hosted Email Security

Once you confirm that your Hosted Email Security product is in your **Shopping Cart**, follow these steps:

- 1 Click **Save Quote** to edit your purchase and review your billing information and checkout instructions.

- 2 Click **Continue Shopping** to return to the Catalog to continue browsing the SonicWall product family.
- 3 Click **Update Quote** to update the cart with the changes made to the **User Count** for the order.

**Edit Quote**

# Managing SonicWall Hosted Email Security

You can manage your **Hosted Email Security** product from the **MySonicWall Dashboard** using the tile called **BY PRODUCT LINE**.

## To Manage your Hosted Email Security:

- 1 Click on the product name in the **By Product Line** tile.
- 2 On the **My Products** page, click on the information icon to access the **PRODUCT DETAILS** page.
- 3 Click on the blue **Hosted Email Security Management** link to be redirected to the **Email Security License Management** page.
- 4 **Update your Hosted Email Security password** by clicking on the blue link that also appears on that page.
- 5 Go to **MySonicWall | Product Management > My Products**.
- 6 Click on the Hosted Email Security **SERIAL NUMBER** in blue and click on the **shopping cart icon** on the **LICENSES** page to go to the Catalog.
  - Click on the **key icon** to enter the activation key for your serial number and click **Confirm**.
- 7 Click on the **Try** link to get to **ACTIVATE SERVICES**.

# Trying SonicWall Hosted Email Security for Free

## To try SonicWall Hosted Email Security solution for 30 days:

- 1 Go to <https://www.sonicwall.com/resources/trials-landing/try-sonicwall-hosted-email-security-for-free-8/>
- 2 Complete the form on the page by entering your:
  - **First Name**
  - **Last Name**

- **Business Phone**
- **Business Email**
- **Job Title**
- **Company**
- **Address**
- **City**
- **Country**
- **States**
- **ZIP / Postal Code**
- **CAPTCHA**

- 3 Click **SUBMIT**.
- 4 Check your email with instructions form after your request has been processed.

## Adding MX Records

After activating your service, you may receive a message to replace your current MX records settings. Mail eXchange (MX) records specify the delivery route for email messages sent to your newly specified domain name. The SonicWall Data Center can then create an internal MX record so mail is correctly routed to the specified domain.

Multiple MX records are assigned to your domain name. Each MX record designates a priority to organize the way your domain's mail servers receive incoming mail messages; the lower the number, the higher the priority. You should always set back-up priority numbers in case the primary mail server fails or is down.

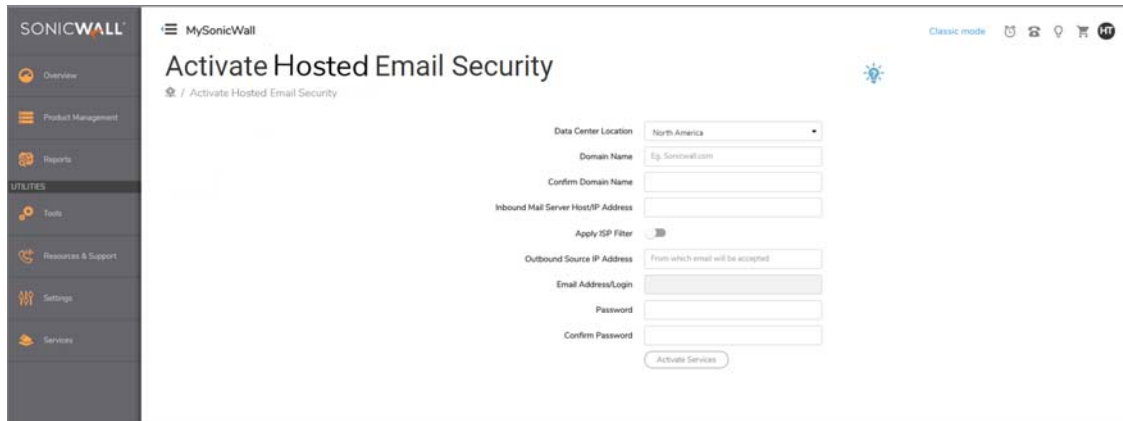

For example, a customer wishes to activate the domain name `jumbo.com`. Since the SonicWall Data Center hosts `snwlhosted.com`, the domain then becomes `jumbo.com.snwlhosted.com`. After an MX record is created, where the customer publishes `jumbo.com` MX `jumbo.com.snwlhosted.com`, SonicWall then publishes an A record: `jumbo.com.snwlhosted.com` A `173.240.21.100`, where `173.240.21.100` is the IP address that SonicWall's Hosted analyzers use to route emails sent to the `jumbo.com` domain.

For outbound email messages, you need to configure the mail server hosting your user mailbox(es) for outbound messages to route all outbound emails to `jumbo.com.outbound.snwlhosted.com`.

For more information regarding MX records, contact your ISP or refer to the Knowledge Base Article “How to set up your MX record after you activated Email Security Hosted Solution (SW9670)” located at: <https://support.sonicwall.com/sonicwall-hosted-email-security/kb/sw9670>.

# Activating SonicWall Hosted Email Security

- 1 If you already have an activation key or have purchased a service, click **Activate Services**.

The screenshot shows the SonicWall MySonicWall web interface. The left sidebar contains navigation options: Overview, Product Management, Reports, UTILITIES (Tools, Resources & Support, Settings, Services), and a top navigation bar with 'Classic mode' and user profile icons. The main content area is titled 'Activate Hosted Email Security' and contains a form with the following fields: 'Data Center Location' (dropdown menu set to 'North America'), 'Domain Name' (text input with 'Eg. Sonicwall.com' as a placeholder), 'Confirm Domain Name' (text input), 'Inbound Mail Server Host/IP Address' (text input), 'Apply ISP Filter' (checkbox), 'Outbound Source IP Address' (text input with 'From which email will be accepted' as a placeholder), 'Email Address/Login' (text input), 'Password' (text input), and 'Confirm Password' (text input). An 'Activate Services' button is located at the bottom right of the form.

- 2 Specify the following fields:

- **Select your Data Center Location—North America or Europe.**

**NOTE:** You cannot change this option once it has been specified.

- **Domain Name**—The primary domain name that is associated with your SonicWall Hosted Email Security solution.
- **Confirm Domain Name**—Example: SonicWall.com
- **Inbound Mail Server Host / IP Address**—The IP address of the mail server hosting your user mailbox(es) for inbound messages.
- **Apply ISP Filter**
- **Outbound Source IP Address**—The outbound IP address of your Hosted Email Security solution. For example, if you registered the domain name `soniclab.us.snlhosted.com`, then the Outbound Mail Server Host is `soniclab.outbound.snlhosted.com`.
- **Email Address / Login**—The email address or login name associated with your Hosted Email Security account.
- **Password**—The password associated with your Hosted Email Security account.
- **Confirm Password**—The password you entered in the previous field.
- Click **Activate Services**. A message displays confirming successful activation and product registration.

- 3 Click **Confirm** on the **CONFIRM DETAILS** popup window.

**CONFIRM DETAILS** [X]

Data Center Location North America

Domain Name [Redacted].com

Inbound Mail Server Host/IP Address [Redacted]

Outbound Source IP Address [Redacted]

Email Address/Login [Redacted].com

Password \*\*\*\*\*9!

[Cancel] [Confirm]

- 4 Navigate to **MySonicWall.com | Services > Available Services > Hosted Email Security (Launch)**.
- 5 Enter the Username or Email address and the Password you configured during the activation process, then click **LOGIN**.
- 6 Click **Go to Service Management** or **Go to HES Console** to continue.

**Activate Hosted Email Security** 

[Home](#) / Activate Hosted Email Security

**Activation Complete**

**SonicWALL Hosted Email Security Product Registered Successfully**

Your new Email host is: **Email Host Name**

Please replace your current MX records settings with following: **MX Record**

Your current settings are:

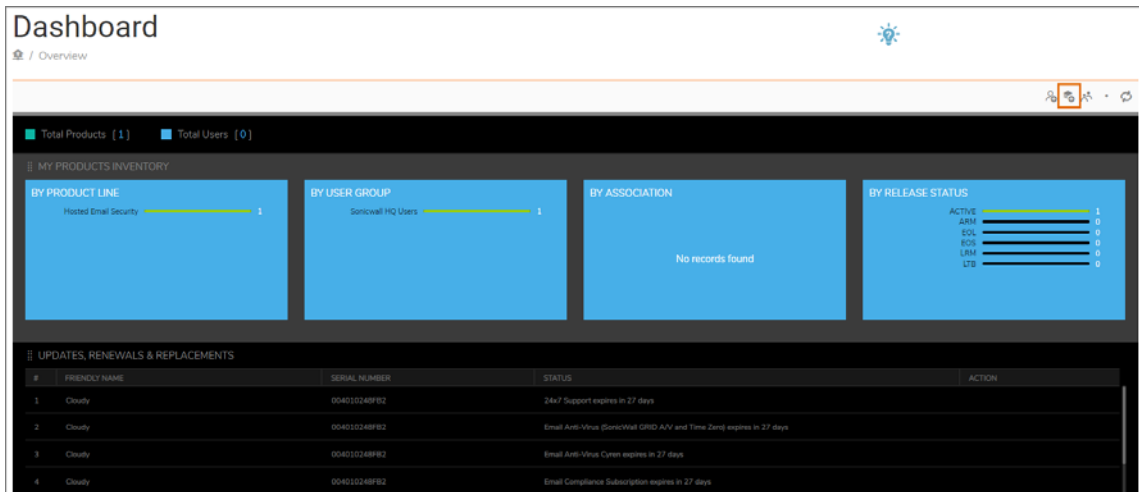

- Current MX Records1
- Current MX Record 2
- Current MX Record 3
- Current MX Record 4

Your outBound hostname is: **Out Bound Host**

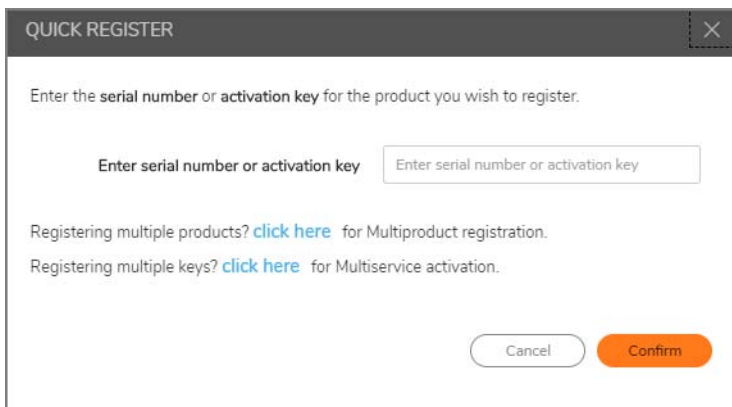

[Go to Service Management] [Go to HES Console]

If you don't have an activation key, follow these steps:

- 1 Login to your MySonicWall account, specifying the Username/Email address and the Password in the appropriate fields.
- 2 Click the **Add Product** icon at the top right corner of the **Dashboard** to complete your registration

- 3 Enter the serial number or activation key for the product you wish to register.
- 4 Click **Confirm**.

The following table is available for your records:

---

Hosted.mysonicwall.com Username:	Your hosted.mysonicwall.com login username.
<hr/>	
Hosted.mysonicwall.com Password:	The password for hosted.mysonicwall.com access.
<hr/>	
Hosted Email Security Login / Username:	The email address or login name for the hosted solution primary domain. (default is <i>admin@&lt;domain name&gt;</i> ).
<hr/>	
Hosted Email Security Password:	The password for the hosted solution primary domain (default is <i>password</i> ).
<hr/>	
Primary Domain Name:	The <a href="https://hosted.mysonicwall.com/EmailSecurity">https://hosted.mysonicwall.com/EmailSecurity</a> primary domain. Note that all other domain names registered are tracked under the primary domain name.
<hr/>	
Inbound Mail Server Host / IP Address:	The IP address of your inbound message mail server host.
<hr/>	
Outbound Source IP Address:	The IP address of the outbound mail server host.
<hr/>	
MX Record Name:	The name specified for the MX record.
<hr/>	
MX IP Address:	The IP address associated with the MX record. This is typically taken from available IP addresses from SonicWall.
<hr/>	
Serial Number:	The Hosted Email Security product serial number.
<hr/>	
Activation Key:	The activation key found on the Order Details for your SonicWall Hosted Email Security service purchase.
<hr/>	

## Managing Hosted Email Security

### Topics:

- [Logging in to Hosted Email Security](#)
- [Configuring System Monitoring](#)

- [Configuring Your Junk Box](#)
- [Verifying Your Hosted Email Security Solution](#)

## Logging in to Hosted Email Security

- 1 Navigate to: <https://Hosted.mysonicwall.com>.
- 2 Enter the **Username** or Email address and the **Password** you configured during the Activation process
- 3 Click **LOGIN**.

## Configuring System Monitoring

The first time you log in to the SonicWall Hosted Email Security solution, you are directed to the **MANAGE | SYSTEM SETUP | Server > Monitoring** page. Configure your settings as follows:

<b>Email address of the administrator who receives emergency alerts</b>	The email address of the mail server administrator. Enter the complete email address. For example, <i>user@example.com</i> . Separate multiple email addresses with a comma.
<b>Select preferred language to send alerts</b>	You can choose between English, Japanese, and Korean.
<b>Use MX Record to deliver mails</b>	Check the box if wanted.
<b>Name or IP address of backup SMTP servers</b>	Enter fully qualified domain names or IP addresses. For example <i>mail2.example.com</i> or <i>10.100.0.1</i> . Separate multiple entries with a comma.
<b>Customized Signature</b>	Enter a signature to append at the end of your email messages.
<b>Subscribe to alerts</b>	Check the box if wanted.
<b>Apply Changes</b>	Click on the button to make your selections effective.

## Configuring Your Junk Box

*To configure your Junk Box settings for Message Management:*

Specify the way your Junk Box Summary messages appear, including the frequency and language.

- 1 Navigate to **MANAGE | SYSTEM SETUP | Junk Box > Message Management**.
- 2 Under **General Settings**, specify what to do when a user unjunks a message:
  - Automatically add the sender to the recipient's Allowed List
  - Ask the user before adding the sender to the recipient's Allowed List
  - Do not add the sender to the recipient's Allowed List
- 3 Under **Action Settings**, indicate the types of messages you want unjunked.
  - Tag unjunked messages with this text added to the subject line:
  - Tag messages considered junk, but delivered because sender/domain/list is in Allowed list with this text added to the subject line:
  - Tag messages considered junk, but delivered because of a Policy action with this text added to the subject line:

- Tag all messages processed by Email Security for initial deployment testing with this text added to the subject line:
- 4 Under **Miscellaneous**, click on the four choices to set your configurations to manage **spam, phishing**, and **virus** email messages, or set email message **policies** for your organizations.

**To configure your Junk Box settings for Summary Notifications:**

Users get Junk Box Summary notification emails listing their recently quarantined messages when they configure these settings.

- 1 Navigate to **MANAGE | SYSTEM SETUP | Junk Box > Summary Notifications**.
- 2 Under **Frequency Settings**, specify the following:
  - Frequency of summaries
  - Time of day to send summary
  - Day of the week to send summary
  - Time Zone
- 3 Under **Message Settings**, specify from the following summaries:
  - All junk messages
  - Only likely junk (hide definite junk)
  - Language of summary email
  - Plain text of graphics of summary
  - Display junk statistics in summary email
- 4 Under **Miscellaneous Settings**, specify the following:
  - Send Junk Box Summary to delegates
  - Enable **single click** viewing of messages. You have three choices:
    - Off
    - View messages only (users can preview messages without having to type their username/password)
    - Full access (clicking any link in a Junk Box Summary grants full access to this particular user's settings)
  - Enable Authentication to Unjunk
  - Only send Junk Box Summary emails to users in LDAP
  - To enable authentication of non ldap users
- 5 Under **Other Settings**, specify the following:
  - Email address from which summary is sent. You have two choices:
    - Send summary from recipient's own email address
    - Send summary from this email address: (enter the email address you want)
  - Name from which summary is sent.
    - Admin Junk Summary
  - Email subject.
    - Summary of junk emails blocked

- 6 Click **Apply Changes**.

**i** | **NOTE:** Click the **Test Connectivity** button to verify that users can log in using the specified URL in the Other Settings section.

## Verifying Your Hosted Email Security Solution

*To verify your SonicWall Hosted Email Security Solution is successfully configured:*

- 1 Go to an external email account, such as Google mail or Yahoo mail.
- 2 Create a new email message:

<b>To</b>	An email address where you receive email that is on the mail server for which you have configured the SonicWall Hosted Email Security Verification Message.
<b>Subject</b>	SonicWall Hosted Email Security Verification Message
<b>Body</b>	SonicWall Hosted Email Security Verification Message

- 3 Send the message.
- 4 In the Hosted Email Security interface, navigate to **INVESTIGATE | Logs > Message Logs**.
- 5 Check the **Inbound** reports to make sure the email appears as **Delivered**.
- 6 Check the mail account you sent the message to. If you received the message, you have correctly configured your SonicWall Hosted Email Security solution.

# SonicWall Support

Technical support is available to customers who have purchased SonicWall products with a valid maintenance contract and to customers who have trial versions.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. To access the Support Portal, go to <https://www.sonicwall.com/support>.

The Support Portal enables you to:

- View knowledge base articles and technical documentation
- View video tutorials
- Access MySonicWall
- Learn about SonicWall professional services
- Review SonicWall Support services and warranty information
- Register for training and certification
- Request technical support or customer service

To contact SonicWall Support, visit <https://www.sonicwall.com/support/contact-support>.
